Kindy had a very special visit from **Londonderry Volunteer Fire** **Fighters** last week...

Year 1 Celebration of Learning

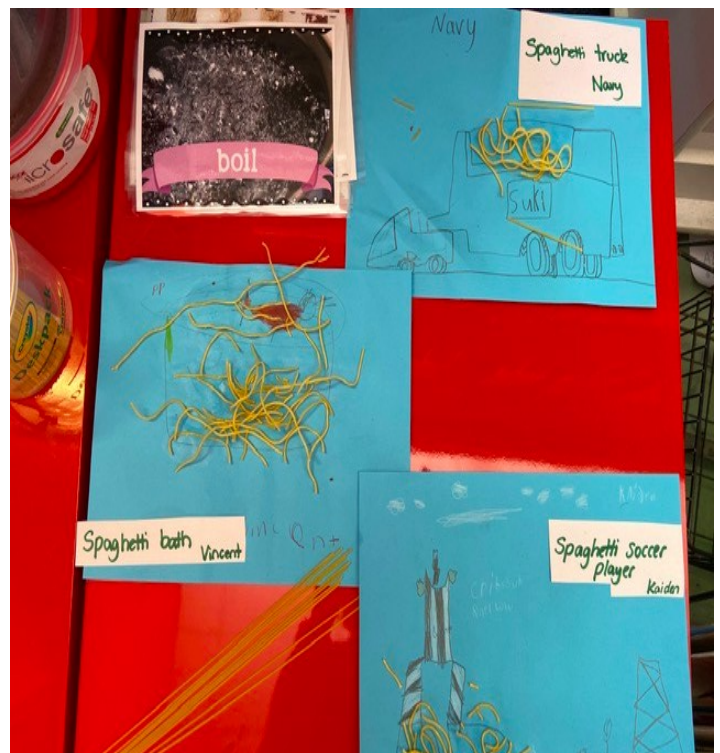

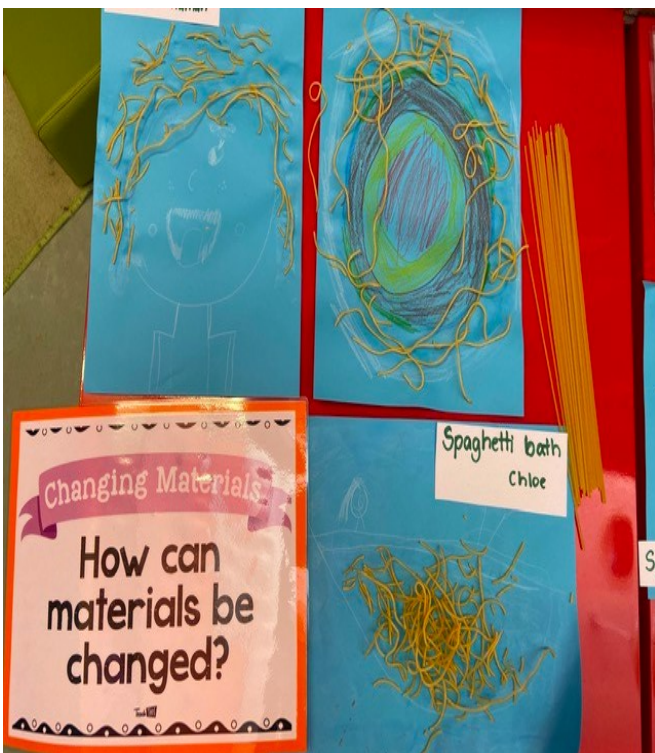

Year 1 had fun investigating how we can change materials!

We compared the properties of raw spaghetti and cooked spaghetti?
They were very different!

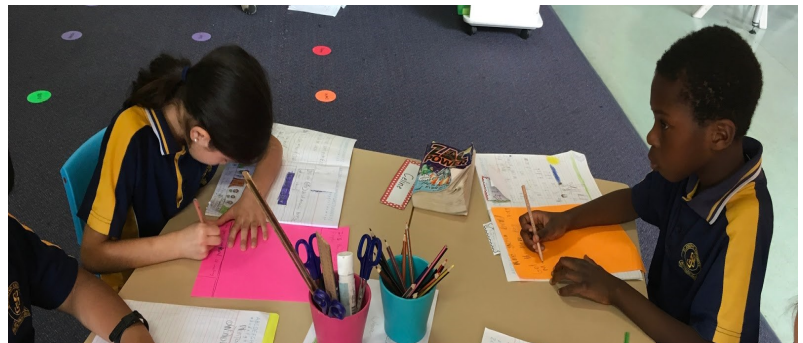

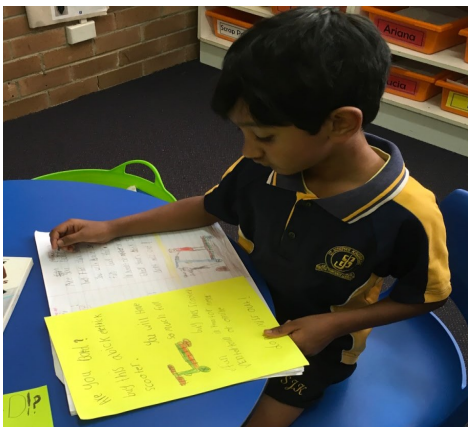

Can you describe the difference between cooked spaghetti and raw spaghetti?

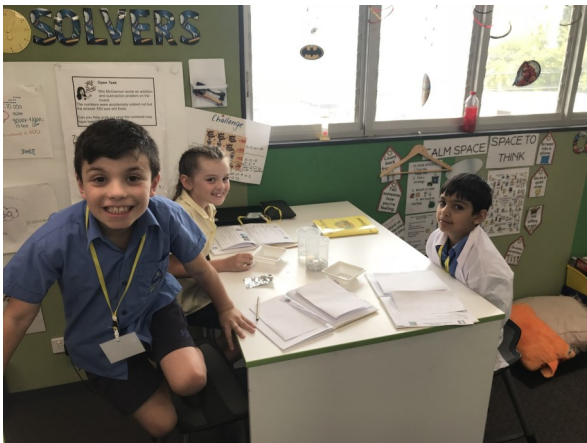

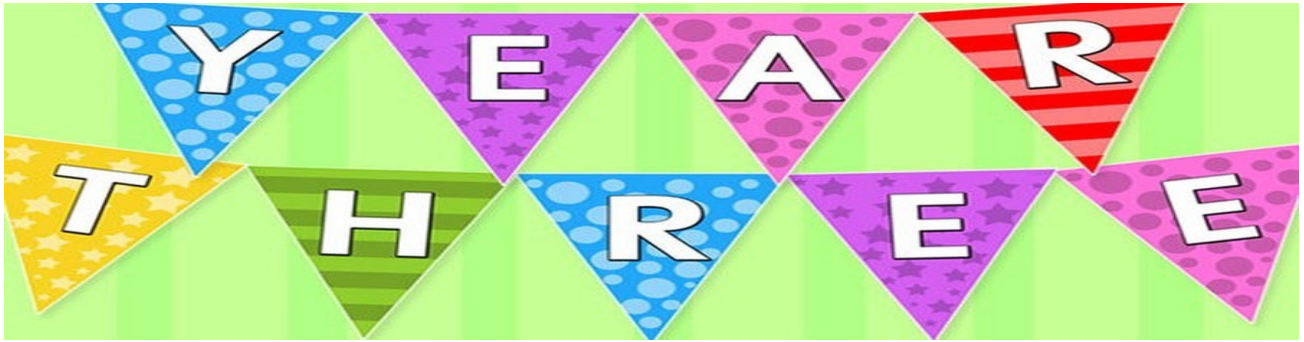

Year 2

Year 2 have been planning and publishing a persuasive poster to advertise their favourite product! They have used a variety of persuasive devices to hook their audience. I wonder have they convinced you?

We have also reflected on the true meaning of Christmas. Year 2 shared their thoughts about what Christmas means to them and their families. Here is what was recorded on our RE wall!

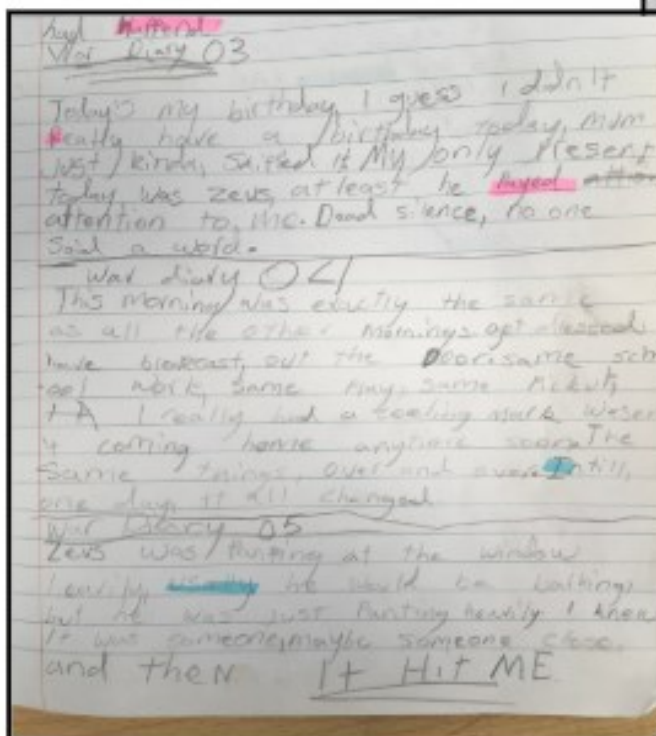

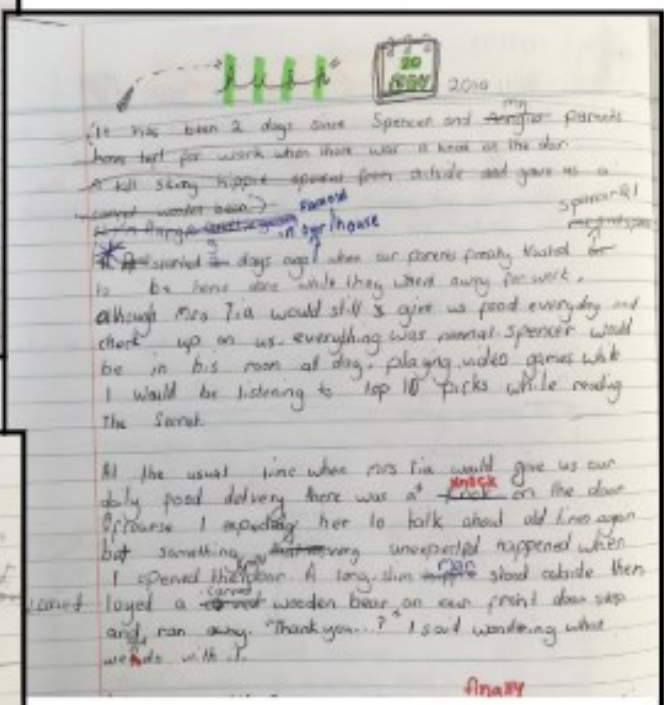

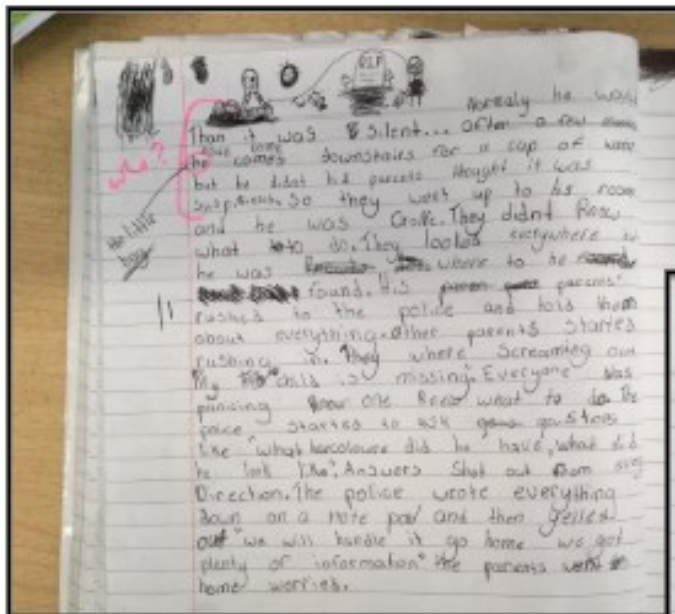

Students in their PBL groups experimented upon what materials would help insulate their toy baby that was covered in ice from melting.

Before doing this, students attempted to insulate their baby and created an algorithm to show the step by step process. Students then put their baby in water to see if their insulation would save their baby.

YEAR 4 WRITING CHALLENGE!

We were given the challenge to write a story in a genre we've never tried before.

Here are a few examples from Cooper, Clarisse and Violet. Are you scared? Can you imagine the perspective of the little boy whose brother has gone to war?

year 5!

XAVIER Student for a DAY!

YEAR 6

In mathematics, Year 6 have been investigating area and real life applications of it. We have been architects and creating 2D plans and 3D models of houses. We have been really engaged in creating our masterpieces and have enjoyed seeing the real life application of maths concepts.
